

# Victaulic® Series 787V Manual Balancing Valve

106.02

## PROJECT INFORMATION

Project  
Contractor  
Job  
Engineer  
Date

## 1.0 PRODUCT DESCRIPTION

**Available Sizes:** ½ – 2"/DN15 – DN50

**Application/Function:** Heating (not including steam) and cooling systems/balancing, pre-setting, measuring, and shut-off

**Maximum Working Pressure:** 400 psi/2758 kPa/28 Bar

**Operating Temperature Range:** -4°F to 248°F/-20°C to +120°C

## 2.0 CERTIFICATIONS/LISTINGS

Product manufactured by Victaulic and/or certified suppliers in accordance with ISO-9001.

## 3.0 MATERIALS AND DESIGN

**Body, Flow Controller, and PT Valves:** Dezincification-resistant brass alloy, equivalent to UNS C35330

**O-ring:** EPDM

**Bonnet, Disc Assembly, and Stem:** Dezincification-resistant brass alloy, equivalent to UNS C35330

**Hand Wheel Assembly:** ABS

**Nut and Set Screw:** Stainless Steel, Type 304

**Packing Nut:** Brass, equivalent to UNS C38000

**Packing and Washer:** PTFE

## 4.0 AVAILABLE ACCESSORIES

- Standard PT Ports
- PT Port Extensions
- Hand Wheel
- Memory Stop Hex Key

## 5.0 VALVE SELECTION GUIDE

Nominal Size	Actual Outside Diameter	Absolute Minimum Flow Rate	Nominal Minimum Flow Rate	Nominal Maximum Flow Rate	Absolute Maximum Flow Rate
inches	inches	GPM	GPM	GPM	GPM
DN	mm	LPM	LPM	LPM	LPM
½ L	0.840	0.10	0.15	0.86	2.53
DN15 L	21.3	0.45	0.68	3.91	11.5
½	0.840	0.07	0.10	3.09	9.09
DN15	21.3	0.32	0.45	14.0	41.3
¾	1.050	0.32	0.49	6.54	19.3
DN20	26.9	1.45	2.23	29.7	87.5
1	1.315	0.26	0.39	10.1	29.6
DN25	33.7	1.18	1.77	45.7	135
1¼	1.660	0.53	0.81	17.4	51.2
DN32	42.4	2.41	3.68	79.1	233
1½	1.900	0.68	1.03	25.2	74.3
DN40	48.3	3.09	4.68	115	338
2	2.375	1.38	2.09	39.5	116
DN50	60.3	6.27	9.50	180	528

L = Low flow

Sizing may be accomplished by using the nominal range of flows provided. Nominal flow rates are based on 1-psi pressure drop with minimum at half turn and maximum at fully open. Absolute flow rates are established by calculating the flow through the valve at its minimum recommended opening position (half turn) with a pressure drop of 1-ft of water and maximum opening position (fully open) with a pressure drop of 20-ft of water. These ranges were chosen as they are achievable by most systems and common measurement equipment.

Flows outside this the nominal range are achievable. It is the responsibility of the system designer to determine whether system conditions such as available differential pressure, maximum component pressure drop and velocity limits, and measurement accuracy will allow valve sizing outside this nominal range. However, it is not recommended to exceed the maximum flow rates listed above. Excessive pressure drop may cause excessive noise or cavitation within the system.

THE INFORMATION CONTAINED ON THIS PAGE IS NOT INTENDED TO REPLACE THE FULL PRODUCT DATA LISTED LATER IN THIS DOCUMENT. THOROUGHLY READ AND UNDERSTAND ALL INSTALLATION INSTRUCTIONS AND PRODUCT SAFETY INFORMATION BEFORE INSTALLING THIS PRODUCT.

## 6.0 DIMENSIONS

### Series 787V

Threaded End

Series 787V

L = Low flow

7.0 PERFORMANCE

Measuring Accuracy

The hand wheel zero position is calibrated and shall not be changed. Valves have a flow measurement accuracy of 2% to 3% when used within their recommended flow range and installed in accordance with the figure below.

**NOTE:** For the most accurate results, a differential pressure meter should be used. For optimal flow accuracy, the valve should be installed with the hand wheel toward the downstream end.

Valve may be installed in any orientation.

For accuracy of measurement, it is recommended that the valve be installed (10) pipe diameters downstream of a pump or (5) pipe diameters downstream of elbows, valves, or other pipe fittings. In all cases, (2) pipe diameters should be located downstream of the valve.

Size		Flow Characteristics
Nominal inches DN	Actual Outside Diameter inches mm	Integrated Orifice C <sub>v</sub> K <sub>v</sub>
½ L DN15 L	0.840 21.3	0.91 0.79
½ DN15	0.840 21.3	4.63 4.00

L = Low flow

<sup>1</sup> Full open valve

## 7.2 PERFORMANCE

### Correction Factors

For liquids other than water, the flow values can be adjusted as follows:

Divide the flow rate by the square root of the specific gravity.

$$\text{Actual Flow} = \frac{q_{\text{Calculated}}}{\sqrt{SG}}$$

This applies to liquids having, on the whole, the same viscosity as water, i.e. most water/glycol mixtures and water/brine solutions at room temperature. At low temperatures, the viscosity increases and laminar flow may occur in certain valves. The risk increases with small valves, low settings and low differential pressures.

### Correction Factors

When  $\Delta p$  and the design flow rate are known, use the formula shown to calculate the CV value.

$$C_v = 1.52 \frac{q}{\sqrt{\Delta p}}$$

q in GPM,  $\Delta p$  in Ft. of H<sub>2</sub>O

$$C_v = \frac{q}{\sqrt{\Delta p}}$$

q in GPM,  $\Delta p$  in psi

#### NOTE:

- Suitable for water-glycol mixtures to 57%

8.0 NOTIFICATIONS

! WARNING

- Read and understand all instructions before attempting to install any Victaulic products.
- Always verify that the piping system has been completely depressurized and drained immediately prior to installation, removal, adjustment, or maintenance of any Victaulic products.
- Confirm that any equipment, branch lines, or sections of piping that may have been isolated for/during testing or due to valve closures/positioning are identified, depressurized, and drained immediately prior to installation, removal, adjustment, or maintenance of any Victaulic products.
- Wear safety glasses, hardhat, foot protection, and hearing protection.

Failure to follow these instructions could result in death or serious personal injury and property damage.

User Responsibility for Product Selection and Suitability

Each user bears final responsibility for determining the suitability of Victaulic products for their end-use application, in accordance with industry standards, project specifications, and Victaulic's published performance, maintenance, and safety data, as well as all warnings and installation instructions. Nothing in this or any other document, nor any verbal recommendation, advice, or opinion from any Victaulic employee, shall be deemed to alter, vary, supersede, or waive any provision of Victaulic Company's standard conditions of sale, warranty, installation instructions, or this disclaimer.

Installation

Always refer to and follow the [Victaulic Installation Handbook](#) or installation instructions for the product you are installing. Handbooks are included with each shipment of Victaulic products, providing complete installation and assembly data, and are available in PDF format on our website at [victaulic.com](#).

Warranty

Refer to the Warranty section of the current Price List or contact Victaulic for details.

Intellectual Property Rights

No statement concerning the use of any material, product, service, or design is intended, or should be construed, to grant any license under any patent or other intellectual property right of Victaulic or any of its affiliates, or as a recommendation for the use of such material, product, service, or design in the infringement of any patent or other intellectual property right. The terms "Patented" or "Patent Pending" refer to design or utility patents or patent applications for articles and/or methods of use in the United States and/or other countries. Victaulic and all other Victaulic marks are the trademarks or registered trademarks of Victaulic Company, and/or its affiliated entities, in the U.S. and/or other countries.

Note

All products bearing a Victaulic trademark are manufactured by Victaulic or to Victaulic specifications. All products are to be installed only in accordance with the applicable Victaulic installation instructions. Victaulic reserves the right to change product specifications, designs and standard equipment without notice and without incurring obligations.
