Now Available in EMEAI, thin wall stainless steel roll groover

EASTON, Pa. – March 30, 2017 – Victaulic's [RG3600 StrenghThin™ 100 Roll Grooving Tool](#) is now available in EMEAI. Specifically designed to prepare thin wall stainless steel pipe ranging from DN50 – DN300 | 2 – 12" with a StrenghThin 100 groove profile, this tool head securely mounts to any tripod stand or flat surface while improving the efficiency of on-site roll-grooving operations.

The portable, lightweight tool is easy to set-up, and features interlocking roll sets, a roll set carrier and a universal power drive that allows the tool to be operated by a REMS Amigo 2 or Ridgid™ 700 power drive. In addition, the RG3600 is designed with an integrated depth stop so no operator adjustment is required, and utilizes proprietary anti-flare technology that ensures maintenance of pipe outer dimension during the grooving process.

About Victaulic

Since 1919, Victaulic's pipe joining and flow control solutions have optimized construction productivity and reduced risk, ensuring projects are completed safely, on time and within budget. Driven by a spirit of continuous innovation, Victaulic's portfolio of 100,000+ products and patented technologies promote freedom of design, as well as simplified inspection and maintenance for the life of any system.

With more than 3,500 employees and 40 international facilities, Victaulic helps customers in over 120 countries succeed in the global construction industry. From the tallest buildings to the deepest mines, customers trust our products to increase overall system durability in the most demanding construction projects and operating conditions.
