Victaulic Unveils the First and Only Coupling Designed for the Evolving Construction Industry

Victaulic's new QuickVic™ System includes the Style 107V Installation-Ready™ Rigid Coupling and fabrication-friendly fittings designed to deliver spool value and raise the bar on reliability.

EASTON, Pa., January 17, 2022 – In January, Victaulic, the world's leading manufacturer of mechanical pipe-joining and flow control solutions, announced the release of their new Style 107V QuickVic™ Rigid Coupling and QuickVic™ fitting technology, designed to deliver unmatched installation confidence, speed, and value to the jobsite and the fabrication shop.

“The Style 107V is truly the best coupling we’ve ever built,” said Gary Moore, Executive Vice President at Victaulic. “We’ve adapted our technology to the evolving construction industry, and we are bringing unparalleled performance and value to the jobsite and the fabrication shop environment.”

The best coupling ever built

The new Style 107V coupling is the first and only coupling designed for high-performance impact wrenches. The Style 107V streamlines installation by eliminating the need for alternate bolt tightening because its design allows installers to tighten one bolt completely and then move to the second bolt.

The Style 107V coupling also includes patented shift-limiting slant pad technology that “locks up” to deliver increased rigidity with visual verification of proper installation. Furthermore, the bolt pad on the Style 107V features a torque-absorber that safeguards against over-tightening, delivering installation confidence and improved rigidity.

Fittings that deliver fabrication efficiency and value

The QuickVic™ System also includes a new line of fittings that deliver maximum spool value. The QuickVic™ Fittings feature a compact, full-flow design optimized for installation in tight spaces without interferences. Up to 50% lighter in weight, the QuickVic™ Fittings provide improved material handling and safety.

For product details and to explore how the QuickVic™ System delivers fabrication value in the plumbing, heating, and air conditioning market visit [QuickVicSystem.com](https://www.victaulic.com/QuickVicSystem.com).

About Victaulic

Since 1919, Victaulic's solutions and design services continue to increase construction productivity and reduce risk, ensuring projects are completed safely, on time, and within budget. With more than 5,000 employees and 55 international facilities, Victaulic helps customers in 120 countries succeed in the global construction industry. www.victaulic.com
