² Requires a Regulated Air Maintenance Trim Assembly (Option 3) with a tank.
³ Electric Release with panel cross-zoned.
⁴ Applies to Fire Pac cabinets containing 2½" - 8 and 7½" - 219 1-inm valve sizes only.
⁵ WARNING: Valves equipped with an accelerator require Air Maintenance Selection 42 or 43.
⁶ Regulated Air Maintenance Trim Assembly with a compressor is for use with an external air source from a ship's air system, tank-mounted air compressor, nitrogen regeneration system with tank, or a tank supplied gas source equipped to under 1.25 psi/8.6 Bar.
⁷ 8 and 12 1/2" 1-inm valve trim may be applied from standard takeouts to accommodate cabinet fitting and chosen options. Follow flowpaths for setup.
⁸ Option N requires Option 1 for Compressor Selection. Option H has nitrogen pressure switch to supplement series the low air pressure switch (signal when nitrogen tank cannot maintain 100-psi/6.9 Bar inlet pressure AWD). NOTE: The nitrogen cylinder is not provided with the nitrogen fill kit.
⁹ All insulated and heated options to have low temperature alarms wired into panel or as auxiliary contact.

¹⁰ These Fire-Pac options do not carry a UL Listing/UL Approval as an assembly; components are UL Listed/UL approved and installed as per the manufacturer's recommendations. All sizes of addressable panel options require the larger cabinet due to panel size not fitting in smaller cabinet.
¹¹ The RP-2001 Panel option is strongly recommended for any Auto Convert trim configurations.
¹² Available in 3" - 8 and 198.9" - 219 1-inm sizes only.
¹³ Not available in the US or Canada.
¹⁴ 1HP compressor options shall require an Air Maintenance Device.
¹⁵ Utilizes site Victaulic Series 98 Pneumatic actuator or use with a dry pilot line.
¹⁶ Utilizes Victaulic High Pressure Secondary and second air pressure switch wired for fire alarm. Second Pressure switch activation at 7psi.
¹⁷ Utilizes Victaulic Series 767 Electric Pneumatic actuator.
¹⁸ Inhibitors for 745 compressors can only be configured as base mounted or with a switch; air maintenance trims with tank options are not available.
¹⁹ When a 240VPA accelerator is required to meet trip time, option 43 on the air maintenance selection is required.
²⁰ Supplied with 165.1 mm couplings.
